

Design and Location

We are proposing an open, accessible structure as shown schematically below. It would be 12' by 18', large enough to comfortably accommodate two picnic tables, have attractive wooden posts, a solid foundation, and a low-maintenance roof. An option under consideration is the addition of railings.

There are two likely locations, one near each end of the beach.

Our Town Council will decide on the design and location on the beach. We anticipate that a second public consultation on the project will be held early in 2021, to gather more public input on the design and location. At that time, we should have more complete diagrams, and sketches of the beach area with the gazebo design incorporated

If we exceed our fundraising goal, we will be able to add some or all of furniture, enhanced landscaping or even electricity. The result could be beautiful.

PROPOSED 216 SQ.FT. PAVILION
